**RESPONSE TO ADVISORY ACTION**

In the Examiner's Advisory Action mailed August 18, 2006, the Examiner stated that the proposed amendments raised the issue of new matter. No new matter was added in the previously submitted Amendment and Response.

Independent Claims 1 and 7 were amended to specifically include elements no found in any single reference and which would not be obvious to combine from other references. Support for the endless orbit element may be found at page 4, lines 8-10, and page 5, lines 19-21. Movement upstream and downstream finds support at page 6, lines 24-26; page 8, lines 9-11; while control of the various motors is described at page 10, line 30 – page 12, line 1.

Again, no new matter was added.

Respectfully submitted,
